

Increase Participation in Benefits Programs

Total Compensation (or) Total Reward Statements are a proven method for:

- **Communication** — Clearly convey the significant value of all employer-provided benefits.
- **Personalization** — Each statement will contain employee specific content and values and your company brand and culture.
- **Engagement** — Attract and retain top talent.

The Trusted Source

With extensive experience in the HR benefits market, Ebix has an understanding of this business in a way few can compare. We continue to expand our solutions to meet today's market demands. It's just one reason why so many employers and brokers across the U.S. know and trust us so well.

We're ready to start helping with your organization's communication needs today!

EBIX TOTAL COMPENSATION STATEMENTS

Boost Employee Retention and Morale

Total Compensation Statements are the most reliable and cost effective way for organizations to communicate the true value they place in their employees.

The Ebix Total Compensation Publications team offers more than thirty years of experience in providing these statements to companies all across America.

Our highly skilled and professional Total Compensation services team will easily guide you through every phase of the process for on-time delivery of these important statements. Throughout the process of design, data gathering, calculations and production, you will be in constant contact with your project manager. Confidential information will be transferred safely through our secure and encrypted project management website.

STATEMENTS PRODUCED BY YOUR EBIX TEAM WILL:

- Present key elements of employee compensation in a variety of different formats.
- Highlight the importance of all employer-provided benefits.
- Be customized with your company logo, supporting graphics, colors, and other details to reinforce your brand and culture.
- Provide you with an electronic PDF statement archive for your files.
